- 2 pagination type (load more / page number)
- Set quantity before adding product
- Fast load speed
- Variable product with variation select
- Compatible with "yith Quick View" plugin.
- Compatible with "yith Compare" plugin.

3-INSTALLATION

There are two methods to install the theme.

a : Installing from Wordpress

b : Installing Via FTP Server

If the normal installation method (a) is not supported by your web host, you will have to use the alternate option (b).

Installing from WordPress

Follow the steps below to install inside WordPress:

Login to WordPress Admin and browse to **Plugins > Add New** and click **Upload Plugin** and in new page Click on **Chosen File** Browse your computer to select "iThemelandco-Woo-Product-Table.zip" (it's in the zip file you downloaded from Codecanyon). Click "**Install Now**" button.

Wait while the plugin is uploaded and installed.

Once it's uploaded, click the **Activate Plugin** link.

Installing via FTP Server

Follow the steps below to install via FTP:

Log into your hosting space via an FTP software.

Unzip the "iThemelandco-Woo-Product-Table.zip" file and **ONLY** use the extracted plugin folder.

Upload the extracted plugin folder into wp-content/plugins folder.

Activate the newly installed plugin. Go to Plugins > Installed Plugins and find "iThemelandco Woo Product Table" plugin and active it.

4-How to Use?

After Install and Activate this plugin a menu will be added in your admin menu named "**Woo Product Table**" that is included 4 submenus as:

- 1- Woo Product Table: Display the list of created shortcodes.

- 2- Add New: Add New shortcode.
- 3- Templates: You can add custom template for table and set it for your shortcode.
- 4- General: Set the general setting. This option will be applied on all of your shortcode.

Product Table List:

There is list of created tables. You can Edit/Delete/Duplicate the current rows, for that you should click on “More” and then choose your action.

Product Table

make the best for yourself, just by clicking
on the new table you will create the best of your site.

Help?
Text messages are used for personal, family, business and social purposes. Governmental and non-governmental organizations use text messaging for communication between colleagues. In the 2010s, the sending of short informal messages has become an accepted part of many cultures, as happened earlier with emailing [1] This makes texting a quick and easy way to communicate with friends, family and colleagues, including in contexts where a call would be impolite or inappropriate (e.g., calling very late at night or when one knows the other person is busy with family or work activities). Like e-mail and voicemail, and unlike calls (in which the caller hopes to speak directly with the recipient), texting does not require

Add Custom Fields and Custom Taxonomise

Set Title/Label

Show/Hide in Devices

Each product has a lot of fields that you can display all of them as a column.

Sometimes you need to have a table with custom columns (Product Fields), in this case you should disable some of fields or add new fields as custom fields too.

In **Columns** tab you can do some actions:

- 1- Show/Hide column for different devices (Desktop, Tablet or Mobile)
- 2- Set Custom Title for each Column
- 3- Set Custom Order for Columns
- 4- Add New Custom Field
- 5- Add Custom Taxonomy

2- Query:

Help?

Text messages are used for personal, family, business and social purposes. Governmental and non-governmental organizations use text messaging for communication between colleagues. In the 2010s, the sending of short informal messages has become an accepted part of many cultures, as happened earlier with emailing.[1] This makes texting a quick and easy way to communicate with friends, family and colleagues, including in contexts where a call would be impolite or inappropriate (e.g., calling very late at night or when one knows the other person is busy with family or work activities). Like e-mail and voicemail, and unlike calls (in which the caller hopes to speak directly with the recipient), texting does not require

The screenshot shows a filter panel for the iThemeland WooCommerce Product Table. It is divided into several sections:

- Order / OrderBy**: Contains two dropdown menus. The first, labeled "OrderBy", has "ID" selected. The second, labeled "Order", has "Ascending" selected.
- Conditions**: A section header for additional filtering options.
- Set Minimum Price**: A dropdown menu with "Enter Price" selected.
- Set Maximum Price**: A dropdown menu with "Enter Price" selected.
- Product Status**: A dropdown menu with "All" selected.
- Post Limit Number**: A dropdown menu with "10" selected.

In this tab you can build your query, this mean you can fetch specific products and display them as table.

There are a lot of options for that, for example you can just display products from specific “Category(s)” or “Custom Taxonomy(s)”, Featured Products, On-Sale products, In custom Price Range and etc.

All of options divided by fields type:

- 1- **Product:** You can Show/Hide individual products.
- 2- **Category/Taxonomy/Tags/Variations:** There are all of Product’s Taxonomies and you can set your custom items for each one.
- 3- **Order / Order By:** Products will be sort by specific field in Ascending/Descending mode.
- 4- **Conditions:** Set Extra condition over your query.

3- **Search box & Pagination:**

If you need to have a search form above your table, you should enable “Search Form” , after that you can customize the search form and Show/Hide search fields. For example you can enable “Category” fields. In this case, user can search for specific “Category” .

b. **Description Length:** How much content to display?

c. **Product Link:** Set product title be linkable or not.

d. **Thumbs Image Light Box:** Display product image in LightBox

e. **Product Title in One Line:** Display wrapped product title.

2- Mini Cart Options:

The screenshot shows a settings panel titled "Mini Cart Options". Under the "Min Cart Positions" section, there are four checkboxes: "Table Header" (unchecked), "Table Footer" (unchecked), "Floating Mode" (checked), and "Side Mode" (checked). Below this, the "Floating Cart Position" is set to "Bottom Right" in a dropdown menu. At the bottom, the "Floating Cart Size [Only Int]" is set to "100" in a text input field with a small up/down arrow icon.

There are 4 types of Mini Cart.

- a- Header: Display Cart above table.
- b- Footer: Display Cart below table.
- c- Floating Cart: Display cart as floating mode beside (you can set position) table.
- d- Side Mode: Display cart as side mode.

You can set “Floating Cart Position” and “Cart Size” too.

3- Other Options:

There are some remaining options for table management.
